-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. Acknowledgment is made in the receipt of the oath and information disclosure statement filed March 18, 2004, and the information disclosure statement filed June 14, 2004.

Information Disclosure Statement

2. The information disclosure statement filed June 14, 2004 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

The GB reference has been considered since it is in English.

Specification

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,029,948 to Breen et al. in view of US 6,226,587 to Tachihata et al.

Art Unit: 3683

Re-claims 1 and 10, Breen et al. teaches a method of controlling an automotive vehicle with a yaw stability control system (such as going through a curve) and a trailer comprising: determining a presence of a trailer; controlling a side slip (articulation angle) in response to the trailer signal; controlling the yaw stability control system (through brake pressure modification) in response to the trailer signal. However, Breen et al. fails to teach modifying a side slip parameter in response to the trailer signal, and subsequently controlling the yaw stability control system.

Tachihata et al. teaches a yaw stability control system for an automotive vehicle with a trailer, in which a side slip angle parameter threshold B is modified in response to the trailer signal, see figure 10. It would have been obvious to one of ordinary skill in the art to have modified the side slip angle parameter threshold of Breen et al. as taught by Tachihata et al., thus maintaining greater control over the vehicle during cornering.

Re-claim 2, see figure 11.

Re-claims 3-7 and 11-14, see figures 7-10 in Breen et al.

Re-claims 8 and 9, see abstract.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kamins et al., Breen, Nakamura et al., Semsey, Boros et al., and Hawkins each teach a yaw control in a vehicle having a trailer. Tanaka et al. teaches modifying side slip thresholds in a vehicle.
